SUMMARY

Full-stack Software Engineer with 5+ years of experience taking products from 0 to 1 and owning features end-to-end at product-focused companies. Experienced in building scalable React, Next.js, and Node.js applications that directly drive revenue and user retention for enterprise clients.

SKILLS

Languages

JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend Development

React, Next.js, Vue.js, React Native, Redux, MobX, Context API, Tailwind CSS, SASS/SCSS, Responsive Design, Cross-Browser Compatibility, Component-Based Architecture

Backend Development

Node.js, Express.js, RESTful APIs, Go, GraphQL, Apollo

Databases

PostgreSQL, MongoDB

Performance & Architecture

Server-Side Rendering (SSR), Static Site Generation (SSG), Code Splitting, Lazy Loading, Web Performance Optimization

Testing

Jest, React Testing Library, Unit Testing, Integration Testing

Tools & DevOps

Git, AWS, Webpack, Docker, CI/CD, Postman, ESLint, Prettier

Workflow & Collaboration

Agile/Scrum, Jira, Figma, Code Reviews, QA

AI-Assisted Development

Claude Code

EXPERIENCE

Software Engineer | **Branding Brand** | Pittsburg, PA

06/2021 - Present

- Took full ownership of features end-to-end — from scoping with design and product to shipping — across mobile apps and PWAs for high-profile retail and hospitality brands using React, Next.js, React Native, TypeScript, and TailwindCSS.
- Contributed to the implementation of a localized, multitenant Progressive Web Application (PWA) to enhance user experience, accessibility, and seamless functionality across diverse user bases, using Next.js, Typescript, and TailwindCSS.
- Optimized business strategies and decision-making through the implementation of Google Analytics, Google Tag Manager, and Tealium analytics, enabling detailed tracking of user interactions via custom events across web applications and mobile apps. This **led to a 20% increase in sales conversion rates**.
- Collaborated cross-functionally with designers, PMs, and brand stakeholders to propose and prioritize new features, contributing directly to product roadmap decisions and improving conversion rates by **up**

to 10%.

- **Provided mentorship to 2 junior engineers** via pair programming, assigning tickets, and reviewing PRs, which improved team efficiency and **reduced bug rates by 30%**.
- Designed and optimized frontend data-fetching architecture, reducing API calls and improving performance across product listing pages

KEY ROLE ACHIEVEMENTS

Madewell Mobile App

- Implemented Brand CMS setup, streamlining content management for categories, promo banners, and trending products, **cutting content update times by 30%**.
- Integrated Google Analytics 360 through Firebase and GTM SDK, improving data tracking accuracy and enhancing marketing decision-making.

PWA - Progressive Web Application template

- Developed reusable UI components, such as buttons, spinners, and forms, improving development speed and reducing UI-related bugs by 25%.
- Built essential features like Account, Order History, Cart, and Wishlist, **enhancing overall user engagement and retention by 20%**.
- Built and maintained a reusable component library to ensure consistency and scalability across multiple brands

RealPage Mobile App

- Transformed a responsive website into a fully functional webview mobile app, optimizing the user interface for mobile devices and integrating native features to enhance performance and user engagement across iOS and Android platforms.

Crocs Mobile App

- Refactored and added new functionality to Thallium analytics, improving data tracking and reporting accuracy, resulting in a 20% better alignment with marketing KPIs.
- Updated Vyking AR Code to improve the AR experience and compatibility with the latest devices, leading to a 15% increase in user engagement with AR features.
- Performed Android 13 (API Level 33) update, ensuring app compatibility and performance improvements, reducing app crashes by 10% on newer devices.

Software Engineer | Leadership Connect | New York, NY

12/2019 - 06/2021

- Using TypeScript, React, and React Native workflows built mobile and web applications used by top U.S. government agencies, board members, federal and congressional leaders.
- Developed and updated iOS & Android mobile apps with React Native, enhancing functionality with Typescript, MobX, and a variety of React libraries and plugins, including Lodash, Blueprintjs, Moment.js, and React Joyride, to expand and sustain features for web applications optimized for all devices.
- Created multiple user-friendly dashboards utilizing ReactJS to display government data, showcasing government expenditure, trends, and information on newly elected officials at state and national levels, along with customizable lists, filters, and alerts.
- Created reusable code libraries, reducing development time for future projects by 25% and improving the efficiency of the development team.
- Wrote unit tests using Jest and contributed to improving code reliability and maintainability

EDUCATION

Fullstack Academy Web Development Bootcamp

07/2019-11/2019

Software Engineering Certificate

Full-time, Full Stack Javascript Web Development Immersive

National Transport University

05/2014

Bachelor of Transport Logistics
